Cookie Notice

This Cookie Notice explains how Sutterson Reed uses cookies and similar storage or access technologies on its website. It should be read together with our Privacy Notice.

1. What cookies are

Cookies are small data files placed on, or read from, a device when a website is used. Similar technologies can include pixels, tags, local storage and software development technologies. They can support essential website functions, remember choices, measure website use and, where enabled, support marketing or embedded third party services.

2. Our approach to consent

We distinguish between technologies that are strictly necessary for the website or service requested by the user and non-essential technologies. Strictly necessary technologies may be used without consent where permitted by law. We do not intend to activate non-essential cookies requiring consent before a user has made a valid choice through the website consent mechanism.

Where consent is required, you can accept or reject non-essential categories and change your preferences later through the cookie settings control made available on the website. Withdrawing consent does not affect the lawfulness of processing carried out before withdrawal.

3. Categories we may use

Category	Purpose	Consent
Strictly necessary	Security, session management, load balancing, consent preference storage and functions required to deliver the website or a service you request.	Not normally required where the statutory exemption applies.
Analytics	Understanding visits, navigation, performance and how users interact with the website so that we can improve it.	Required where the technology is not strictly necessary.
Functional	Remembering optional preferences or enabling enhanced third party features that are not essential to the service requested.	Required where not strictly necessary.
Marketing	Measuring campaigns, understanding engagement or supporting advertising or re-targeting where such tools are used.	Required before activation.

4. Cookie details and live settings

The precise cookies and similar technologies present on a website can change when website features, embedded content, security tools or analytics providers are updated. For that reason, the website consent platform or cookie settings panel should be treated as the current operational record of non-essential cookie categories and, where configured, individual technologies, providers, purposes and durations.

Sutterson Reed should periodically scan and review the website to ensure that the information presented in the consent platform remains accurate and that non-essential technologies are blocked until the required consent has been obtained.

5. Third party technologies

Some website functions may be supplied by third parties, for example video, mapping, analytics, security, scheduling, social media or embedded content providers. Where a third party places or reads a non-essential technology from your device, consent will be requested where required. Third parties may process information under their own privacy terms.

6. Managing cookies

You can manage non-essential cookies through the website cookie settings control. You can also use browser settings to block or delete cookies. Blocking strictly necessary cookies may prevent parts of the website from functioning correctly. Browser controls do not always govern every type of similar technology, so the website consent control should also be used where available.

7. Do Not Track and browser signals

Browser privacy signals are not implemented consistently across all services. We respond to legally required consent choices through our consent mechanism and will review recognised technical standards as they develop.

8. Changes to this Cookie Notice

We may update this Notice when our technologies, providers or legal obligations change. The current version and effective date will be published on the website.

9. Contact

Questions about cookies, consent or personal data may be sent to office@suttonsonreed.com. For broader information about our processing of personal data, please read our Privacy Notice.
